

**Strategic partnership project  
"School Education Against Climate Change" (SEAC)  
2021-1-ES01-KA220-SCH-000023837**

The general objective of the project is to generate knowledge on how to promote Youth Goal 10 and SDG 13 in primary education, in order to promote sustainable and responsible environmental behaviours in the new generations of the European girls and boys.

**Intellectual outputs**

We are going to develop a guide with methodologies/resources and an education game to promote Youth Goal 10 and SDG 13 in primary education.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

## Activities

Focus groups will be held with the project's target groups in order to learn about their needs, perspectives and proposals.

- Staff/Staff partners and school education teachers: (a) which competencies and tools are the most adequate to address climate change among girls and boys; (b) which competencies and tools are the most adequate to promote environmental behaviors among girls and boys; (c) which characteristics an Educational ToolKit should have where methodologies, strategies, resources and tools for the two previous points can be found; and (d) examples of methodologies, good practices and tools they want to share in relation to points a and b.
- Primary school children: (a) what characteristics their school classes should have to learn more about climate change; (b) what characteristics their school classes should have to promote environmental behaviors.
